Pickering, ON | patelshivani1410@gmail.com

GitHub: <https://github.com/shivani2224> | Portfolio: <https://shivani-patel.org/>

Front-end developer building responsive React applications with a focus on clean component architecture, TypeScript, and test-driven development. Hands-on experience with React 19, Vite, Tailwind CSS, Vitest, and Framer Motion. Comfortable writing reusable components, integrating REST APIs, and deploying production builds to Vercel. Detail-oriented with strong documentation habits and team-communication skills. Based in Pickering, ON. Permanent Resident, eligible to work full-time in Canada.

SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frameworks: React 19, React Hooks, Tailwind CSS, Bootstrap, Framer Motion

Testing: Vitest, React Testing Library

Tools: Git, GitHub, Vite, npm, VS Code, Chrome DevTools, Figma, Vercel

Other: Responsive Design, Component-Based Architecture, REST API Integration, Cross-Browser Compatibility

PROJECTS & PORTFOLIO

Focus Timer App - React 19, TypeScript, Vite, Tailwind CSS, Vitest

[GitHub](#)

- Built a multi-timer focus app supporting several independent timers running simultaneously, with start/pause/resume/reset controls and custom duration editing.
- Implemented Picture-in-Picture mode so users can keep timers visible while working in other windows, plus keyboard shortcuts (spacebar to toggle) for faster control.
- Wrote 40+ unit and integration tests using Vitest and React Testing Library, covering individual components and full timer workflows.
- Added a circular progress ring with color transitions and sound alerts on completion.
- Deployed to Vercel with production build configuration.

HR Dashboard Prototype - React 18, Vite, Tailwind CSS

[GitHub](#)

- Built a role-based dashboard with three user types (Admin, Manager, Employee), each with its own navigation and view.
- Implemented work session tracking — login, break-in, break-out, and logout — with real-time hours calculation and end-of-session summary.
- Structured the app into reusable components and used React state hooks for session and authentication flow.
- Designed clean, responsive layouts using Tailwind CSS.

Portfolio Website

[Portfolio](#)

- Designed and built a responsive personal portfolio site to showcase projects, skills, and contact information.
- Added scroll-triggered animations and page transitions using Framer Motion.
- Integrated a working contact form using EmailJS so visitors can send messages directly from the site.
- Deployed on Vercel.

EXPERIENCE

Front-End Projects & Independent Development

Feb 2025 – Present

- Built and deployed multiple React applications including a Focus Timer App (React 19, TypeScript, Vitest), an HR Dashboard prototype, and a personal portfolio website.
- Designed reusable components, responsive layouts, and used React Hooks (useState, useEffect) for state and lifecycle management.
- Wrote 40+ unit and integration tests with Vitest and React Testing Library to verify component and workflow behaviour.
- Integrated REST APIs added animations with Framer Motion and implemented a working contact form using EmailJS.
- Used Git and GitHub for version control; deployed production builds to Vercel.

Sr. Medical Billing & Operations Support

Jun 2020 - Jan 2025

UniMusk Automated Billing Pvt. Ltd.

- Worked daily within technical billing systems and large datasets, ensuring accuracy across high-volume records and structured workflows.
- Coordinated with internal teams to resolve discrepancies, document processes, and meet deadline-driven service targets.
- Trained and supervised a team of 10; monitored individual productivity, accuracy, and reporting outcomes.
- Produced monthly performance and reporting summaries using Excel and internal reporting tools.
